

16/03/2018

Note Taker: Anthony

All were present except Tom (At an interview)

Topics Discussed

The team took two and a half of the three hours during the meeting to work out certain implementations of user-stories in order to focus on the more pressing issue of the presentation + final report. Not much was discussed other than intercommunication between subgroups in this meeting, however the final half hour was spent updating the github user stories to fill them with missing issues.
