### **Topics Discussed**

The team discussed several necessary tasks that must be worked on and completed before the end of sprint 3.

1. Implement and complete the voting system
  - a. Queries must be developed for the vote system (Saleh and Alexander)
2. Clean up and unify the CSS across all pages of the website (Anthony)
3. Make user profile of all users visible to all other users
4. Unit tests must be developed and attached to TravisCI
  - a. GET & POST validation
    - i. Must test the loading of pages through get and post
    - ii. Must test data submission of forms through get and post
    - iii. This will be done by Tom and Ruochen
