Note Taker: Anthony Andreoli

Topics Discussed

During the tutorial section, the TA explained to us the requirements of Sprint 1. He mentioned the following:

1. Complete the front-end template
2. Post all meeting minutes
3. Task Breakdown on github (which can be found in the “Projects” and “Issues” tab on git)
4. Plan for Sprint 2 (User stories on github are for Sprint 2)

All of these have been completed as can be seen on our [git page](#).
